IMPORTANT

TURN 02*, **TURN 13*** and **TURN 05*** are considered the most demanding for the braking system.

Sochi is one of the most challenging circuits for the braking system, even if the management of the friction material temperature is the key to managing the race with the guarantee of consistent performance and controlled wear. The most critical aspect, with regard to the braking system, is linked to the correct sizing of air intakes that ensure the optimum operating temperature for the brakes.
