

## **BREMBO LAUNCHES THE GREENANCE KIT: LOW EMISSIONS AND REDUCED TOTAL COST OF OWNERSHIP FOR LIGHT COMMERCIAL VEHICLES**

*The future oriented brake kit offers a greener solution for light commercial vehicles by reducing particulate emissions by more than 80%<sup>1</sup>, while lasting up to 3 times<sup>2</sup> longer than an equivalent Aftermarket product. The result is a lower total cost of ownership that drops on average by 15%, combined with top braking performance.*

Stezzano (Italy), 1 February 2024 – Brembo, the leading company in the development and production of high-performance braking systems, announces its go to market of the Brembo Beyond Greenance Kit, an eco-friendly brake solution, currently specifically engineered for light commercial vehicles.

Deriving its name by merging the words 'GREEN' and 'PERFORMANCE', the Brembo Greenance Kit is a solution that anticipates low environmental impact requirements. It matches both customer expectations and environmental awareness to contribute to a sustainable and greener world, without compromising on the top braking performance expected from Brembo products.

Greenance Kit is the perfect combination of performance and durability, ensuring a much lower environmental impact during braking, with a significant reduction in particulate emissions: -83% in PM10<sup>1</sup> and -80% in PM2.5.

This pioneering solution guarantees extended mileage and a significant improvement in terms of the total cost of ownership of vehicles amounting to an average reduction of 15%. It ensures an increased durability of the brake discs, tripling<sup>2</sup> their expected lifetime. This leads to relevant cost savings over the life of the vehicle that is a top priority for long-distance professionals and drivers of light commercial vehicles and fleets.

Greenance Kit features a jointly developed range of new combined innovative alloy discs and newly engineered brake pads, which greatly enrich Brembo's Aftermarket line-up. This is directly derived from the company's extensive heritage and experience and its continuous focus on innovation in Racing/Motorsports and the Original Equipment (OE) markets.

Thanks to Brembo's unparalleled technological know-how and continuous research and development in brake technologies, the Greenance Kit offers the most sustainable solution without compromising performance. These kits have already passed the ECE-R90 homologation tests as well as the most severe benchmark road tests, conducted by the company's technicians, accordingly to Brembo's most stringent requirements.

The Greenance Kit is part of the Brembo Beyond product line, the company's solution line tailored to bring innovation and sustainability in replacement parts for all the new mobility vehicles.

Brembo's Greenance Kit is available on the market for the most popular (European) light commercial vehicle models, such as the Citroën Jumper, Fiat Ducato and Talento, Ford Transit,
