

THE BREMBO GROUP

Brembo is a world leader in the design, development and production of braking systems and components for cars, motorbikes, industrial vehicles, for the OE market, after-market and racing.

Brembo guarantees the utmost safety and comfort and improved product performance thanks to process integration and optimisation of the entire production cycle, from the initial design and cast-iron or aluminium casting to assembly, testing and simulations on the bench, track and road.

Brembo's constant quest for innovation calls for new technologies, new materials, new shapes and new markets; product **performance** is accompanied by the search for a unique **style** in line with the **design** of the equipped vehicles.

Research at Brembo is conducted at the Research & Development Centre, which has also been involved since **2002** in mechatronics, a border science that combines mechanics, electronics and informatics.

The increasing application of eco-compatible technologies, recycling of all materials used in the production process and systematic prevention of all forms of pollution all bear witness to Brembo's commitment to safeguarding the environment.

For Brembo the workforce is considered an invaluable asset, providing the thrust and drive that lead to any breakthrough – Brembo works as one great team.

Brembo sells its products in 70 different countries and has production sites in Italy, UK, Poland, Czech Rep., Germany, Brazil, the USA, Mexico, China and India. The products are marketed by companies located in the main outlet markets, with headquarters in Spain, Scandinavia, Russia, the USA and Japan.

The Group has more than 10.800 collaborators; close on 10% of whom are engineers and product specialists involved in research and development.
In 2019 the Group's turnover is 2,591 million euros.

Stezzano (Italy), 16 September 2020
