CIRCUIT LENGTH
N 3,337 M
NUMBER OF LAPS
$\mathcal{S} 78$
NUMBER OF BRAKE ZONES/LAP

* 11

## MPORTANT

TURN 10*, TURN 01* and TURN 05*

This is a historic city circuit that winds through the streets of the Principality and can create many problems for the single-seater brakes. In fact, the winding track with poor grip often means that the drivers need to control the car often using the brakes, with negative reflexes on the caliper and brake fluid temperature. In the past this event has often been a theatre of problems connected to overheating and vapour lock of the braking system (a phenomenon in which the brake fluid reaches the boiling point inside the caliper), leading to a lengthening of the pedal in braking which has many times caused drivers to retire, if not crash. In our day and age the progress made in cooling the brakes has held these problems at bay, although particular attention still needs to be given to managing temperatures during the race weekend.
